

KODAK EKTAPRO 9020 CINE Slide Projector

KODAK EKTAPRO Cine 9020 Slide Projector - the slide projector for the cinema advertising. Bright projection light, automatic lamp change and a soft slide fade are the highlights of this projector.

The **KODAK EKTAPRO 9020 Cine Slide Projector** is especially designed for use in cinema theatres.

Based on the KODAK EKTAPRO 9020 Slide Projector this model shows some new features and thus fulfills the special technical requirements in the movies area. For instance the projector is equipped with the Extra Bright Lamp-module for obtaining a particularly bright projection light. This is important if slides are projected on wide screens or during admission when partly dimmed lights are still on.

An automatic lamp changer is installed in the lampmodule. In the moment of a lampfailure within a fraction of a second the system switches automatically over to the second lamp. The audience will not notice that! A feature that gives security during the slide advertising display. The lamp failure is indicated by two red LEDs.

Another important feature of the EKTAPRO 9020 Cine Projector is its Soft Slide Feature. Gone are the times of hard slide changes fatiguing the audience's eyes. With

the EKTAPRO 9020 Cine Projector slides are gently faded in and out. As soon as the timer is switched on, the projector automatically executes a soft slide change.

Important features of the KODAK EKTAPRO 9020 CINE Slide Projector:

- **Extra Bright Lamp-Module:**
The module provides highest lightoutput for best projection results in cinemas.
- **Another 20% reserve of light with special High Light Mode**
- **Automatic lamp changer:** In case of a lamp failure within 0.3 s the system switches over to a second lamp. That adds security to your slide advertising display. The defect is indicated by a flashing LED.
- **Timer:** With the built-in timer you easily perform your self running presentation. Settings between 1 and 60 seconds can be made. The time between 1 and 30 seconds can be set in small steps (approx. 1 second) .

Feature Overview - continuation

- Slides change is performed in a gentle smooth way. Within half a second the slides are faded out and in.
(Please note: As this projector is a modified version of the standard Ektapro 9020 model, setting of different fade times via the IR remote control and use as part of a MASTER/SLAVE application (use of the integrated dissolver) is not possible!)
- Last slide position memory: When switched off the projector keeps the tray position in mind. When switched on the tray is automatically transported to this position. This feature is important when controlling the projector via mains.
- No-Slide - No Light: If there should be an empty tray compartment, the projector's shutter won't open. The screen stays dark and your audience won't notice that there was a missing slide.
- Standby - the elegant pause. With a keystroke or command you set the projector in standby. Lamp and fan are switched off.
- Autofocus. The projector features one of the fastest autofocus systems. The projected images will automatically be in focus.

Some further features of interest:

- Serial Interface: Allows total control and access of all features via a PC or other control devices.
- Random Access: Have access to each slide in the tray via the IR remote control or a connected PC!
- Switchable Auto Zeroing: In the moment an empty slide compartment is detected the tray will be brought to zero. This feature is important if the tray is only loaded with few slides. Within a maximum of 3.5. seconds the slides are again ready to show
- Voltage: Adjustable for all international voltages and frequencies
- Dimension (LxWxH): 340 x 336 x 140 mm
- Weight approx. 9 kg
